## Purple Skies Wind Energy Center

The Purple Skies Wind Energy Center is a proposed 1,000 megawatts wind power generation facility in Lyon, Lincoln, Murray, Redwood, and Pipestone Counties, Minnesota, targeted to begin operating in 2027. Wind energy is clean, renewable power from one of the oldest known energy sources, and today is one of the most affordable ways to modernize America's energy grid.

## **Invested in Your Community**

Clean energy projects live at the intersection of community interest, environmental stewardship, and innovative business practices. Invenergy designs projects that provide direct benefits to their host communities through new economic growth opportunities and additional funding to local organizations and nonprofits that are vital to the community's health and safety.

## **Project Timeline**

2022 – 2025

Development

Activities include permitting, environmental studies, interconnection studies, etc.

Q1 2026 - Q4 2027

Construction

Q42027

Operation

**Millions** invested in local tax revenue, land costs and lease payments, and wages and benefits over the life of the project

Approx 1,000 MW is enough electricity to power more than 284,000 American homes

Emissions reductions equivalent to **675 million trees planted** 

Emissions reductions equivalent to **253,000 cars off the road** 

Supports local education, emergency & veteran services and environmental stewardship

Commits to developing projects while minimizing impacts to sensitive ecological resources and ensuring responsible land use

Invenergy's Miami Wind Energy Center, located in Gray, Hemphill, and Roberts Counties, Texas.

## A Proven Track Record in Sustainable Energy Development

Invenergy is a leading, privately-held developer and operator of sustainable energy solutions.

A U.S.-based company, Invenergy invests \$400 million annually in the home communities where its projects are located.

Invenergy has successfully developed over 200 projects, including wind, solar, transmission infrastructure, green hydrogen, natural gas power generation and advanced energy storage projects.
